

PROFESSIONAL SUMMARY

In early 2019 I opted to leave financial services to pursue a career in software engineering. I was seeking a way to make a greater impact on the world at large. Given the pervasiveness of the internet in our daily lives coupled with my desire to master a technical skill, a career in web development provided the perfect pathway for merging my professional and personal desires. Now, I am seeking an opportunity to continue developing my technical skill set in a job that can affect positive change in people's lives by creating and maintaining web applications that occupy an ever-growing space in their worlds.

TECHNICAL SKILLS

- **Programming/Web:** Python, Django, JavaScript, HTML, CSS
- **Database/DBMS:** SQL, PostgreSQL, SQLite
